

Criando um repositório

1. Nome do Repositório;
2. Descrição;
3. Marque a opção *“Initialize this repository with a README”*. Escolha o tipo de linguagem que será usado em *“Add .gitignore: None”*.

Create a new repository

A repository contains all the files for your project, including the revision history.

Owner

Repository name

Great repository names are short and memorable. Need inspiration? How about [super-fortnight](#).

Description (optional)

☒  **Public**

Anyone can see this repository. You choose who can commit.

☐  **Private**

You choose who can see and commit to this repository.

☐ **Initialize this repository with a README**

This will let you immediately clone the repository to your computer. Skip this step if you're importing an existing repository.

Add .gitignore: **None** ▼

Add a license: **None** ▼
